POULTRY SUPPLIES

GARDEN *and* FIELD SEEDS

**SPRING
1932
(SECTION 2)**

J. D. ROSS, President

The Friendly Store

When you enter our store, you are coming into a friendly store—not the old fashioned kind of a “gossip center” that the old village store was with cracker barrels and big heating stove, but a modern mercantile establishment that tries to understand your wants and to serve you so that your needs are fully taken care of. We know the majority of our customers by their first name and feel that they are personal friends of ours. True, we want their business, but we want their faith, confidence and friendship first. Our increasing business and the constant number of new faces that keep coming in convince us that our policy is right.

Our MAIL ORDER FRIENDS receive the same friendly courteous treatment as though they came in personally. We try to put ourselves in the mail order customer's place and govern ourselves accordingly. 673 orders from new customers and a big increase in the total orders from old customers

makes us feel that we are following the right road to success. MAKE OUR FRIENDLY STORE YOUR HEADQUARTERS.

A NEW CHANGE IN POLICY

In previous years we have issued one complete catalog, but this year are issuing two distinct catalogs. Section one listing Garden and Flower Seeds, Lawn Grasses, Fertilizers, Flower Plants, Pets and Pet Supplies, also Nursery Stock. Section two listing Baby Chicks, Poultry Feeds and Supplies, Garden and Field Seeds. If you secure but one catalog and desire a copy of the other, we shall gladly mail you one free upon receiving a request for same.

Very truly yours,

GRAHAM & ROSS MERCANTILE CO.

HOW TO ORDER

Write your name and address plainly and state whether you wish your merchandise to come by mail, express or freight.

KEEP A COPY OF YOUR ORDER and check goods when received. We use the greatest care in filling orders, but in spite of all, mistakes will occur. If so, kindly notify us immediately and the same will be promptly rectified.

INSURANCE: We are not responsible for goods after being delivered to the post office or general carrier. If you want your order insured, add the following rates to your remittance:

Up to \$5.00.....5c From \$25.00 to \$50.00..10c
From \$5.00 to \$25.00....8c From \$50.00 to \$100.00.25c

C. O. D. Merchandise can be sent C. O. D. but it costs extra for these shipments as a fee of 12c is charged by the Express Company or Post Office.

PARCEL POST RATES

FIFTH ZONE—Within 600 to 1,000 miles of Great Falls.....	9c	6c

WEIGHT LIMIT—Packages are subject to a maximum weight of 70 lbs.

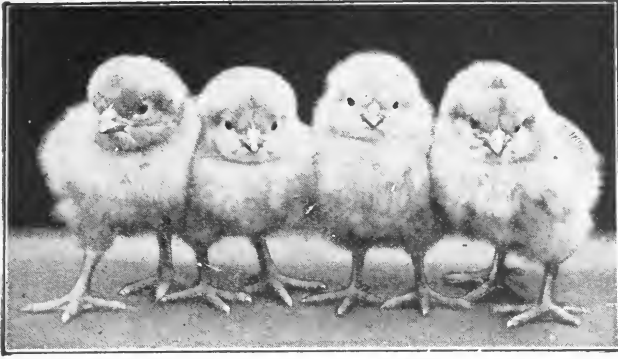

OUR GUARANTEE TO YOU

We guarantee every article in this catalog to be **EXACTLY** as pictured and described, and we will refund the purchase price if found otherwise. We guarantee all seeds to be true to name and description and to carry the official state germination and purity test.

Success in gardening and farming depends largely upon soil, cultivation and climatic conditions over which we have no control.

THE GRAHAM & ROSS MERCANTILE COMPANY gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants it sells, and will not be responsible for the crop.

If goods are not accepted on the above terms, notify us at once, and we will give instructions for disposition of goods.

QUALITY BABY CHICKS

from

SCOTT CHICK HATCHERY

INCORPORATED

524 First Avenue South
GREAT FALLS, MONTANA

It has been the policy of the Scott Chick Hatchery and of J. R. Scott personally, for 30 years to supply customers with the best there is in chicks at the least possible cost. Hundreds of customers voluntarily testify this policy has been carried out. Many years have been spent in building breeding flocks of the highest productive and standard quality.

WHY should you order cheap chicks simply to save a few cents at the time of buying? Two or three cents added to the cost of a productive bred—profit producing pullet is a saving when compared with a low priced, non-producing, ill bred bird. Just one or two more eggs in a single year will pay the difference. Place your order now—let us reserve your favorite date.

J. R. SCOTT

Who has devoted more
than 30 years to practical
poultry breeding.

1932

Incubators

Our machine is manufactured by the largest incubator manufacturer in the world and contains many improvements only found in the most expensive models such as automatic egg turning trays, Celotex Insulation, bottom hinged doors, semi-automatic Ventilation and pure copper boilers. All boilers are oversize with outside baffles and the entire heating system has been approved by the National Board of Underwriters.

Size	Weight	Price
150 eggs	108 lbs.	\$24.50
300 eggs	141 lbs.	28.75
450 eggs	162 lbs.	46.00
600 eggs	224 lbs.	54.25
900 eggs	324 lbs.	82.00
1200 eggs	450 lbs.	108.00

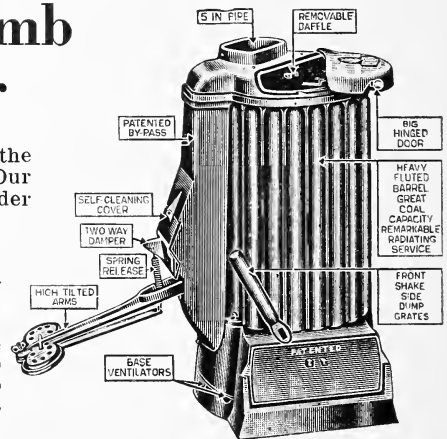

The first three sizes are carried in stock at Great Falls, and the last three sizes are shipped direct from our Eastern factory.

1932 Improved Makomb Giant Coal Brooder

Patented features and proper construction enables the "Makomb Giant" to burn soft coal as well as hard. Our 1932 stove carries the largest coal capacity of any brooder stove its size. In addition, the following features: Automatic By-Pass Control; Removable Baffle Plate; Tilting Canopy; 5-inch Stove Pipe; Large Rocker Grate, and Fluted Barrel which presents maximum heating surfaces and insures economy in fuel.

Size Canopy	Weight	Price
47 inch	105 lbs.	\$17.50
56 inch	129 lbs.	22.00
65 inch	152 lbs.	26.00

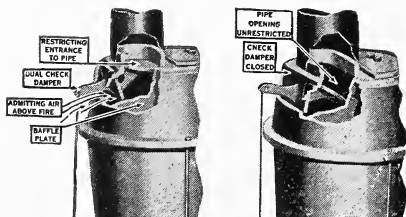

All Prices F. O. B. Great Falls.

Makomb Standard Coal Brooder

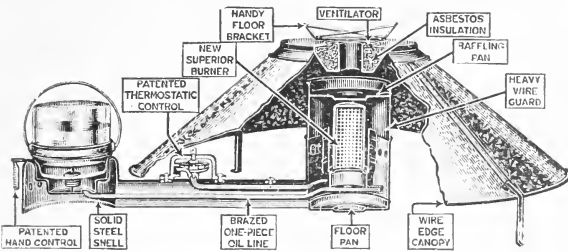

Automatic Double Damper Control

A satisfactory and automatic brooder that meets all price competition. Revolving canopy, extra large coal door, exclusive damper action, improved canopy of greater strength.

62 inch	112 lbs.	22.00

1932 Automatic Ker-O-Stat Oil Burner

The Only Successful Automatic Blue Flame Brooder.

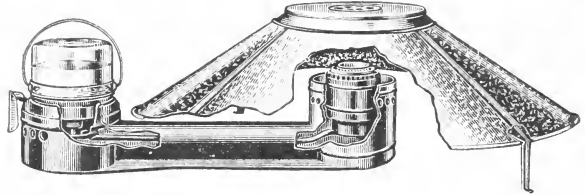

Safety Pilot Light and full Thermostatic Control make it completely automatic, with no danger of the flame going out. Drain plug and two-way feed prevent clogging. Perfect Ventilation under the new type canopy is always assured.

Size Canopy	Weight	Price
32 inch	36 lbs.	\$14.00
52 inch	51 lbs.	17.95

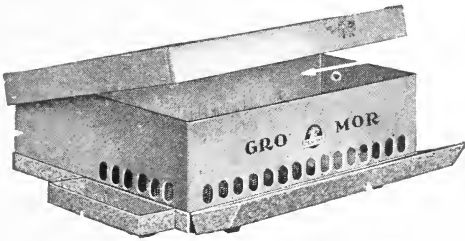

SIMPLICITY OIL BROODER

Construction: Special Blue Flame Burner needs no priming and generating. Equipped with new pilot light. Canopy made of heavy galvanized steel with outer edge stiffened. Equipped with ventilator.

Size Canopy	Weight	Price
32 inch	34 lbs.	\$ 9.45
42 inch	38 lbs.	11.95
52 inch	51 lbs.	13.90

GRO-MOR BROODER

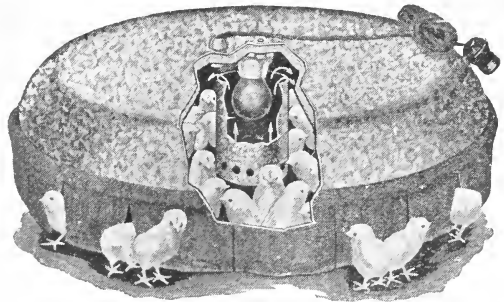

A low priced brooder equipped with feed and water pans. Size 20"x24"x7½" high giving ample head room for chicks up to four weeks of age. Equipped with ten feet of cord, porcelain socket terminal plug and circulating drum to enclose the bulb. Weight 8 lbs. Price, \$2.65. Add Postage.

Graham & Ross Junior Electric Brooder

For small flocks, our Electric Brooder is practical and economical. For general use, a 25-watt bulb provides ample heat. Canopy is insulated and curtain surrounding canopy furnished.

Chick Capacity	Weight	Price
80	8 lbs.	\$3.50
130	16 lbs.	6.00

Special Notice

Folks, if you are interested in a larger size brooder than we have listed, let us know, as we are in position to furnish you with the latest in large, automatic electric, gas and distillate burning brooders. We have obtained the state rights from the world's largest manufacturer of brooders and are in position to save you money. WRITE for free catalog on brooders.

THE "NO-SET" POULTRY GUARD

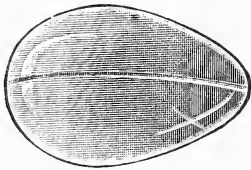

Will not injure the hen in any way and effectually prevents her from setting. Will usually break up the most stubborn case in two to three days.

Full directions furnished with each guard.

No. 290—Each, 15c; two for 25c, postpaid.

CHINA NEST EGGS

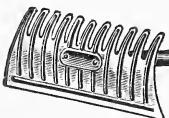

Made of white porcelain, natural in appearance, and uniform in size. Will not easily break. Per dozen, 50c; postpaid, 60c.

LICE REPELLING WHITE NEST EGGS

Closely imitate a real egg in appearance, and contains a powerful disinfectant. Will aid greatly in keeping the nest and hen free from vermin. Soon pay for themselves in increased yield. Per dozen, 50c; postpaid, 65c.

MOE'S HANDLED SCRAPER

Made of hard stiff sheet steel. Light in weight, yet strong and durable. Just the thing for keeping the dropping boards clean.

No. 51—Each, 50c, postpaid.

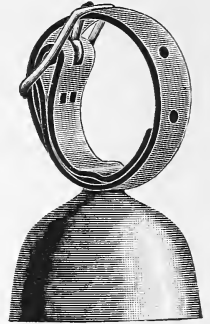

DO THE COYOTES DISTURB YOUR FLOCK OF TURKEYS

It is discouraging to raise a fine flock of turkeys until they are large enough to eat in the grain field and then lose most of them through hawks and coyotes.

Place a few of these bells around the necks of some of them and your flock is protected from all animals and hawks.

THE CHEAPEST PROTECTION THAT YOU CAN BUY FOR YOUR FLOCK OF TURKEYS.

Made from the best grade of bell metal, fitted with good leather strap for placing around neck. Each, 25c; 2 for 40c; 6 for \$1.15; per dozen, \$2.20, postpaid.

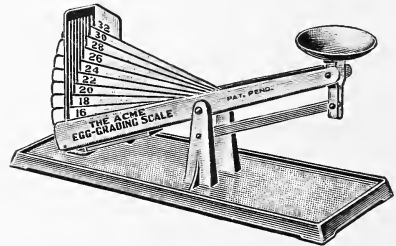

EGG SCALES, POSTPAID 95c

Be sure of your hatching eggs. Use only uniform heavy eggs.

ACME EGG GRADING SCALE

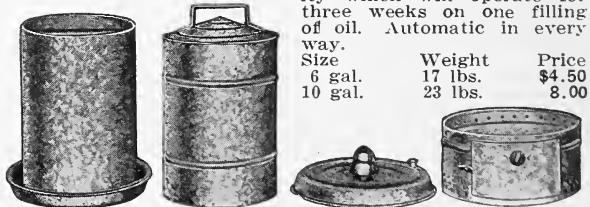

Will grade any egg from 16 to 32 ounces per dozen. This scale is being used by more than a hundred state institutions and has been officially adopted as the standard scale in many sections of the United States. It is being used by all of the commercial Egg Grading Plants in Montana at the present time. Each, \$2.85, postpaid.

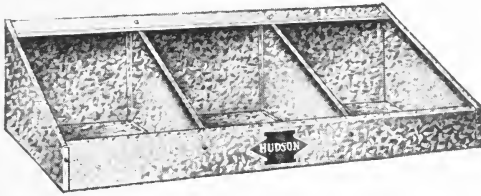

DIAMOND G HEATED FOUNT

Made of 26 gauge copper bearing steel which prevents rusting. Furnished with new type chimney burner, large oil capacity which will operate for three weeks on one filling of oil. Automatic in every way.

Size	Weight	Price

DIAMOND "G" FEEDS ARE CLEAN

The picture shows an actual sample of strings, corn cobs, nails, bolts and dirt, removed by our modern cleaning equipment from a car of supposedly clean grain. All Diamond "G" Feeds and "X-L" Seeds are as clean as it is humanly possible to get them.

Our elevator and warehouse are open for inspection at any time and we always welcome visitors. We are pleased to show anyone how feeds and seeds are cleaned and how Diamond "G" Mashies are manufactured and the ingredients that go into them.

Alfalfa Seed

ALFALFA SEED PRICES LOWEST IN MANY YEARS

Don't pass up this opportunity to seed Alfalfa at an extremely low cost. You may not see such prices again in twenty years. And now that good seed is so very cheap, don't risk getting weeds on your farm by sowing unclean and untested seed. **THE BEST IS CHEAP THIS SEASON.**

"X-L" BRAND

The finest grade of Alfalfa Seed grown in Montana and would command a premium on any eastern market, because of its purity and extreme hardness. Free of dodder, well scarified and graded.

COMMON MONTANA ALFALFA SEED

While not carrying as high a test as our "X-L" brand, this seed will prove satisfactory in every way. This seed is thoroughly cleaned, plump, well graded and excellent germination. A real buy at this price.

"X-L" AFFIDAVIT GRIMM

This seed was grown from registered seed inspected by our personal representative and certified by growers affidavit. Carries an excellent purity and germination test.

"X-L" REGISTERED GRIMM

At the price we are offering this seed, no one can afford not to plant at least a few acres of the highest quality of alfalfa seed known. Officially registered and certified by representatives of the Montana Seed Growers Association. Sold in sealed bags only, carrying Blue Tag which is the highest grade established.

Clover Seed

To insure high germination, we scarify all seed

CLOVER AND GRASS SEED PRICES DOWN TO ROCK BOTTOM

This is the time to improve your land by turning a good portion of it back to meadows and pastures.

"X-L" HI-GERMINATING WHITE SWEET CLOVER

Especially suited to heavy, gumbo ground. A high rank grower and wonderful soil improver. Makes a much better hay crop the second year than the first.

"X-L" HI-GERMINATING YELLOW BLOSSOM

This variety does not grow as tall as the White. Makes an excellent hay as the stalks are not too coarse and are very fine in texture.

"X-L" HI-GERMINATING ALSIKE OR SWEDISH CLOVER

This variety is a perennial and one of the hardiest varieties known. Absolutely refuses to winter kill. Capable of resisting the extreme of drought or wet.

"X-L" HI-GERMINATING MEDIUM RED CLOVER

Sometimes called June Clover. It will produce two crops of hay and usually can be depended upon for a crop of hay and crop of seed. May be sown either in the spring or fall.

"X-L" Brand Seed Produce Large Crops.

Grasses

The Kind of Meadows You Get From Mixtures

"X-L" Hi-Germinating Brome Grass

We consider Brome grass the most important tame grass for Northwestern conditions. No amount of cold seems to be able to kill it. Will grow under conditions that are very dry and it can also stand being covered with water for one or two weeks in early spring. Most economical pasture grass we know.

"X-L" Hi-Germinating Kentucky Blue Grass

This makes the best, sweetest and most nutritious pasture for all kinds of stock. A perennial that is often mixed with other grasses forming a permanent pasture. Our seed is bright, plump, testing 21 pounds to the bushel which is considered above the standard.

"X-L" Hi-Germinating English or Perennial Rye Grass

Excellent for both pasture and meadows, moist and rich clay loams are the soils best suited to it. The seed is heavy and very quick to start.

"X-L" Hi-Germinating Meadow Fescue or English Blue Grass

This is an excellent permanent pasture grass and extremely hardy and the quality of the grass is high for feed purpose. Withstands drought and heat and severe cold equally well.

"X-L" Hi-Germinating Orchard Grass

No farm should be without a small field of this wonderful grass as in many respects it is superior to all other grasses, stands the drought well, grows in the shade, does well in poor or wet ground. Furnishes pasture three weeks earlier than other grasses and after close grazing, ten days rest is sufficient to produce another growth.

"X-L" Hi-Germinating Red Top

Makes a good growth the same year it is sown and continues growth throughout the season. Commonly known as Herd's Grass. Generally used in grass mixtures for hay purposes.

"X-L" Hi-Germinating Timothy

As a crop for hay, Timothy is probably unsurpassed by any other grass. Greatly relished by all kinds of stock.

"X-L" Hi-Germinating Rye Grass

Sometimes called Slender Wheat Grass. Affords excellent pasturage and provides large quantities of hay. Thrives on all soils, gives good returns on strong alkali land.

"X-L" Hi-Germinating Sudan Grass

This grass is closely related to the Cane family, but is not so coarse and yields more feed per acre. Found favor with the Montana farmer by its ability to withstand drought and the fattening properties that it carries. We offer Montana grown seed this year.

"X-L" Hi-Germinating Huntley Permanent Pasture Mixture

Recommended by the Federal Experiment Station at Huntley as the best mixture for Montana. Tests have proved that it will pasture more stock per acre than any other.

Suggested for one acre:

- 3 lbs. Brome Grass.
- 4 lbs. Kentucky Blue Grass.
- 4 lbs. Orchard Grass.
- 3 lbs. Meadow Fescue.
- 1 lb. White Clover.
- 1 lb. Alsike Clover.
- 16 lbs. for \$3.20

Barley

TREBI

This is a rather new six-row variety which has been giving exceptionally good results in Montana, especially suited for irrigated lands. Straw of medium height and fairly stiff so that it is less likely to lodge than other varieties. Recommended especially irrigated land.

HANNCHEN

Two row. One of the most popular of two-row varieties. A consistent yielder in Montana for years.

HORN BARLEY

This is a new variety just introduced in Montana and tested at the Experimental Stations at Bozeman and Moccasin. From tests made at these stations and from individual plots, it has been proven that Horn Barley is the highest yielding of all Two Row Barleys, withstands drought and yields well in dry land, as early to mature as any of the two row barleys. We believe this new barley shall become the most popular dry land barley. See Price List.

Below we list the average yield on trial plots at Montana Agricultural stations on Horn Barley:

Station	Average Bushels		
	3 yrs.	5 yrs.	6 yrs.
Moccasin—Dry Land			48.9
Bozeman—Irrigated	73.8	72.5	

Horn Barley

WHITE HULLESS

This is a six-row beardless barley which threshes out of the straw like wheat. It is a good barley for dry sections as it is very early, especially valuable for hogging off as there are no beards to bother the stock. It is also sown for early hay.

BLUE HULLESS

Faust Strain. It has proven itself to be by far the highest yielding of all hulless types. An average yield of 35 to 40 bushels is very common, and the feed value of this variety is the highest of all barleys.

Seed Corn

**High Yielding, Early Maturing,
Montana Grown
"X-L" HI-GERMINATING
FALCONER**

The highest yielding of all corn varieties for the Northwest. Earlier than any of the Dents and hardier. It will grow and develop in cold weather when other sorts stand still. Large ears containing 8 to 12 rows.

**"X-L" HI-
GERMINATING
N. W. DENT**

Extremely hardy and will produce crop when all other dents fail owing to its frost and drought resistance. Ripens in 80 to 90 days.

**"X-L" HI-
GERMINATING
PIONEER OR
RUSTLERS
WHITE DENT**

The earliest Dent to pick for those wishing only the grain crop. Cures quickly as the cob is small. This corn has never failed to produce some ripe corn for us even in the worst years.

**"X-L" HI-GERMINATING GEHU
OR YELLOW FLINT**

The very earliest of flint corn producing two or three ears to the stock. For some of Montana's high altitude counties this corn is a wonder as it is drought, frost and hail resistant to a greater extent than any other variety.

**"X-L" HI-GERMINATING
WHITE FLINT**

Matures in about 80 days and grows to a height of 4 to 5 feet. Especially adapted to hogging down as the ears grow close to the ground.

**"X-L" HI-GERMINATING
ELEPHANT FODDER**

Our particular strain of this variety has become popular with hundreds of stock growers in Montana, because of its large size, earlier maturity, finer and richer fodder and ease of handling. Grows to an average height of 7 to 8 feet, is very leafy and has a small stalk.

Beans

**Montana Grown
"X-L" HI-GERMINATING
GREAT NORTHERN FIELD**

We wish each customer of ours would plant a few acres of this bean. You will always find a ready market. Montana grown beans are known the country over and always command a premium.

**Millet**

**"X-L" HI-GERMINATING
EARLY FORTUNE MILLET**

One of the surest crops in the Northwest and especially valuable as a grain crop for late planting. Yields enormous crops of rich food, adapted to stock and poultry feeding.

**"X-L" HI-GERMINATING
GERMAN**

This variety is especially adapted for hay because of its taller growth, extreme earliness and rich feeding value. We recommend Southern Grown Millet seed for hay purposes.

**"X-L" HI-GERMINATING
SIBERIAN**

As both a hay and seed producer, it ranks very high. This is the hardest and most planted variety in the Northwest.

**"X-L" HI-GERMINATING BROOM
CORN OR HOG MILLET**

The most common variety grown for seed production. Makes an excellent feed for hogs, cattle and poultry. A great drought resister.

Seed Oats

Victory Oats

Dry Land Montana Grown

“X-L” HI-GERMINATING SWEDISH SELECT

The straw is coarse, noted for its stiffness and power to withstand lodging. Weighs from 35 to 45 pounds per bushel. They are quite early and less liable to smut than most any other sort.

“X-L” HI-GERMINATING VICTORY

This is the standard oat for Montana. It is of the Swedish Select type, but much improved. It is a heavy yielding variety of thin hulled, plump white oats. Our seed weighs over 40 pounds to the bushel and is free of wild oats.

Montana Grown Canadian Field Peas

Field Peas are one of the most useful of crops. The straw is equal to clover and the grain is one of the most nourishing of foods for all kinds of stock. In order to aid in harvesting, we recommend that they be sown with oats or Spring Rye.

Spring Rye Seed

Useful as a late crop both for hay and grain and excellent for summer pasture.

Sunflower Seed

“X-L” HI-GERMINATING MAMMOTH RUSSIAN

A wonderful producer of fine quality silage. Will produce as high as 12 tons to the acre. Sown in rows wide enough apart to permit cultivating between them.

Rape

Fine for Hogs and Sheep

“X-L” HI-GERMINATING DWARF ESSEX

Sow 6 to 10 pounds per acre. Very popular for hog and sheep pasture where soil is good and fairly well watered. Keeps growing out as it is eaten off.

Flax

“X-L” HI-GERMINATING RESERVE

This new variety of Flax has been proven to be the best yielder of any variety yet tried at the Bozeman Experiment Station. Over a three-year period yielded 27.8 bushels per acre on irrigated land. Much earlier than Russian Brown or Bison and ripens very evenly.

Spring Wheat

We can furnish either Marquis or Supreme and if interested, write for prices at planting time.

PRICE LIST VEGETABLE SEEDS

A complete description covering all Vegetable Seeds that we list will be found in Section 1 of our 1932 catalog and a free copy will be gladly mailed you upon request.

Vegetable Plants and Roots

All vegetable plants are grown under our direct supervision by experienced experts. We have built up a large growing business on the quality of plants we send out. A trial order will convince you.

SHIPPING DATE—All plants will be shipped, when to our judgment, danger of frost is over. If ordered with seeds or poultry supplies, balance of order will be filled and acknowledgment of plant order will be packed in shipment.

TOMATOES—We can furnish the following varieties: Bonny Best, Earliana, John Baer and Red Head.

CABBAGE—We have the following varieties: Golden Acre, Copenhagen Market, Danish Ball Head, Late Flat Dutch, Jersey Wakefield and Red Head.

CAULIFLOWER—Improved Stock Early Snowball.

CELERY—Golden Self-Blanching.

CUCUMBERS—Improved White Spine.
